POWERED BY BINARY IONIZATION TECHNOLOGY®

STERAMIST® LEADING THE FIGHT AGAINST POISONS & COVID-19

White Knight can help **ALL** organisations to get back up and running in a **SAFE** and **ENVIRONMENTALLY FRIENDLY** way during the **COVID-19** pandemic and as restrictions ease.

Our SteraMist® enhanced disinfection service offers a range of benefits over alternative cleaning methods:

- It **DOES NOT CONTAIN ACIDS, AMMONIA** or **CHLORINE**, unlike other, potentially harmful cleaning substances
- It provides the **highest level of disinfection possible** - to LOG-6, 99.9999% effectiveness
- It **inactivates COVID-19** and other harmful pathogens on **ALL SURFACES** and in the **AIR** in **less than 5 seconds**
- It provides an **extremely rapid turnaround** from treatment to re-use of treated areas
- It **reaches areas other cleaners can't** - the mist treats exposed and even some unexposed and normally inaccessible areas, such as heating, ventilation and air-con (HVAC) systems
- **We validate and prove our results** via on-site swab testing and a full laboratory decontamination report

STERAMIST® IS THE SOLUTION
