

WHITE KNIGHT
SERVICE GROUP

CLEAN, DEEP CLEAN, THEN STERAMIST®!

Cleaning and **Deep Cleaning** can be great processes to undertake, however they only offer varying levels of more basic protection from harmful micro-organisms such as coronavirus (**COVID-19**).

SteraMist® enhanced disinfection gives **NEXT LEVEL protection**, providing you with the most effective disinfection and decontamination solution available.

GOOD

BETTER

BEST

BASIC CLEANING

- Defined as cleaning down with a cleaning cloth (or cleaning wipe) using a domestic category cleaner such as a 'Flash' type product
- Will remove more visible dirt and residues from surfaces
- **Typically leaves behind 40%-60% of surface pathogens** (micro-organisms such as bacteria and viruses)
- Prepares surfaces for further disinfection

DEEP CLEANING*

- Defined as cleaning with a more advanced or aggressive cleaning product
- Often applied via a manual spray device or power sprayer
- Many products have to be left 'wet' on surfaces to dwell and take effect over a period of time
- **Typically leaves behind up to 10% of surface pathogens** (micro-organisms such as bacteria and viruses)
- Majority of products contain aggressive and potentially **harmful chemicals...**
- May leave behind **AMMONIA or CHLORINE** which can cause respiratory and other health issues such as skin irritations

TOMI
ENVIRONMENTAL SOLUTIONS

STERAMIST
powered by BINARY IONIZATION TECHNOLOGY™

- **Market-leading enhanced disinfection** using Cold Plasma ARC and BIT solution technology
- Fine mist spreads everywhere, **disinfecting ALL SURFACES** and **even the AIR** - inactivates COVID-19 in **less than 5 seconds**
- Leaves no residues - the fine mist **disappears in seconds**
- **Environmentally friendly** - does not contain ammonia or chlorine
- **Disinfects to 99.9999% effectiveness**, which is surgical grade and the **highest level possible**
- **Results are VALIDATED** via on-site swab testing and a full lab decontamination report
- Can be used on top of your current cleaning routines

*White Knight offer a bio-film removal treatment prior to **SteraMist®**, acting as an alternative to deep cleaning. We use a special solution that is free from harmful chemicals and leaves no residues.
